**KUALA LUMPUR**  
NGO/NFP Price: MYR 2,100  
Individual Price: MYR 2,500

**BOOK & PAY BEFORE 07 NOVEMBER 2023 FOR JUST MYR1,950**

Approximately 4% of the world's population suffer from chronic wounds or wound healing disorders. According to current studies, chronic wounds cost at least MYR50.000, pure treatment costs, without consideration of the follow-up costs or sick leave. Complicated cases can also quickly exceed the cost limit of MYR100.000.

In many countries the topic of chronic diseases, hygiene and improvement of the quality of life Index for chronic diseases is of particular importance. In many developing countries, massive complications arise due to lack of hygiene and inadequate treatment of the underlying diseases (e.g. diabetes).

IHM aims at creating sustainable training structures and expertise to enable a holistic treatment and education of patients and thus improve the lives of those affected.

In Europe, there are very good training and further training courses for doctors and nursing staff, as well as excellent patient training and documentation in place. This is why IHM is to translate the European standards into the local context of developing countries and to initiate a educational projects for them. Through the introduction and establishment of treatment standards, the success of treatment can be sustainably ensured by local, specially trained specialists on the long run.

IHM - Institute for technology-based education in  
Health, Management and Social Services International

IHM International, also known as the Institute for Technology-Based Education in Health, Management and Social Services International, was established in Austria in 2012. The association's goal is to create, promote, and provide support for educational programs that focus on the areas of health, management, and social services. IHM is an international non-profit organisation that serves as an intermediary between partner institutions and global markets.

Our expertise lies in developing, hosting, and organising medical, medical-economic, and educational projects and programs in close collaboration with European and local partners.

To ensure the academic coverage and quality assurance of our training programs, we partner with international and European academic educational institutions and universities. With almost two decades of experience in this field, we have established a broad national (EU) and international academic and governmental network.

Our international teaching programs are recognised academically in all the countries where we offer them and are often regarded as some of the best courses available in the respective countries.
